PRESS RELEASE

Las Vegas, Nevada (USA), Saturday, October 31, 2026

FABRIZIO GIUGIARO AND CAVËN ATELIER UNVEIL HOMMAGE 26 IN LAS VEGAS: THE DESIGNER REINTERPRETS HIS ORIGINAL CREATION FOR TODAY.

Just one week after the Mexican debut of the Peralta D - the spectacular one-off coupé in hand-beaten copper - and only a few months after the unveiling of the Bizzarrini 5300 Aperta Lusso, a project that fulfilled a family design dream, bringing a new "New Classic" icon to life), Fabrizio Giugiaro heads to Las Vegas for another landmark debut. A golden period of tireless creativity and international momentum for his advanced design centre that reaffirms its leading role on the international stage.

At the prestigious Concours at Wynn Las Vegas, Fabrizio Giugiaro joins CAVËN Atelier to unveil **HOMMAGE 26.**

The project launches the "Designer Series" conceived by CAVËN Atelier: a series of exceptionally bespoke automobiles created around the principle of Design Authorship, allowing the original designer of an iconic car to pick up the pencil again decades later, free from the industrial constraints of the time.

For this inaugural chapter, Fabrizio Giugiaro has chosen to revisit one of his most significant and celebrated creations almost thirty years later. Drawing on his design maturity and the development technologies available at the Moncalieri centre, Giugiaro has reinterpreted that iconic silhouette for a limited series of just 25 examples.

THE GFG STYLE DESIGN CENTRE AND FABRIZIO GIUGIARO'S VISION

"Experiencing such an intense period is extraordinary: from classic lines to the most daring experimentation, culminating in our arrival here in Las Vegas today with the HOMMAGE 26," comments Fabrizio Giugiaro. "All of this demonstrates the incredible versatility and technical excellence of our design centre in Moncalieri."

"Returning to a project I designed midway through my career has been a fascinating and wonderful challenge," Fabrizio continues. "We did not want to create a simple restyling exercise or indulge in nostalgia, but to show how one of our designs, with its timeless lines, can evolve through attention to detail, experience and today's technologies. Certain key elements remain faithful to my first design from 1998 - particularly the front end, where we have retained the original identity and design cues while reinterpreting the idea we had back then of connecting the lights and air intakes through an innovative concealed lighting system that was not technically feasible at the time. The rear is even more distinctive, , while the interior features fresh graphics along with redesigned seats to enhance both comfort and ergonomics."

AN ENTIRELY NEW EXECUTION BY GFG STYLE

Although HOMMAGE 26 preserves the original car's recognisable architectural proportions, the body surfaces have been completely reworked and crafted in carbon fibre, allowing even tauter, more sharply defined lines to be sculpted. Everything else is the result of GFG Style's bespoke work:

- **Aerodynamics and style:** Aerodynamic efficiency has been refined through an innovative styling solution that creates seamless visual continuity between the roof and the rear tail. The overall design integrates a rear spoiler and two active side flaps, along with a new opening rear window positioned between the cabin and the engine bay, specifically designed to let the engine's unmistakable soundtrack resonate directly inside the cockpit.
- **Precision engineering:** The naturally aspirated 5.0-litre V10 engine has been reworked by Italtecnica to reach 8,500 rpm, delivering 540 PS in GT specification and 560 PS in Performance specification, paired with a manual gearbox for the purest driving experience.
- **Chassis and suspension:** New suspension adjustable between Comfort and Sport modes, an upgraded braking system and exclusively designed 20-inch wheels.

EXCELLENCE IN BESPOKE AUTOMOTIVE CRAFTSMANSHIP

The collaboration between CAVËN Atelier and Fabrizio Giugiaro embodies a philosophy that the atelier calls Respectful Evolution. HOMMAGE 26 has been created to offer a pure driving experience with the unmistakable character of a designer-authored car, conceived for the most discerning collectors worldwide.

Production will be limited to **25 numbered examples.** Each car will be built using a donor vehicle.

TECHNICAL SPECIFICATIONS / HOMMAGE 26

- Design and Development: Fabrizio Giugiaro / GFG Style
- Commissioned by: CAVËN Atelier
- World Premiere: Concours at Wynn Las Vegas (31 October 2026)
- Production: 25 numbered examples
- Engine: Naturally aspirated 5.0-litre V10 (Powertrain development: Italtecnica)
- Power Output: 540 PS (GT) / 560 PS (Performance) @ 8,500 rpm
- Transmission: Manual
- Suspension: Electronically controlled, with two modes (Comfort / Sport)
- Wheels: 20-inch wheels
